Project Work:

ULTRASONIC GLASSES FOR BLIND

I am strong believer that technology can be very useful to human beings, if put to good use. Just like that, a little piece of tech - "Arduino(mini computer)" is so much powerfull.

This works as in the utrasonic sensor which is mounted on the head of the glasses, constantly keep on detecting the objects in front of them, if the object comes near than 30 cm, the arduino is programmed along with a high-level language python3, to speak to the user to "STOP! STOP! THERE IS A OBJECT NEAR TO YOU." through the earphones.
