V.S.B. College of Engineering Technical Campus

Coimbatore

Dear Sir/Maadam

I am eager to submit my application in Intern position at Zekatics. My academic background, focused on courses like Microcontrollers, Internet of Things, VLSI or Embedded Systems coupled with my passion for electronics and eagerness to learn, makes me confident that I can contribute significantly to your team as a fresh engineer. I am well knowledgeable, being able to create projects that would be functional and creative. I like to overcome challenges and gain practical knowledge of my field, but the best part of what I am most excited about if given the opportunity to join your team is being able to contribute while developing my skills in a work environment.

I have also been exposed to a range of technologies throughout my academic journey journey, such as Digital Signal Processing, basic Java, Cloud Computing, and C Programming. These domains have allowed me to solidify a strong technical base and versatile skill set which gives me ability to creatively approach an issue and design solutions. My academic projects have instilled in me the ability to adapt rapidly to a changing environment. My expertise in programming, Internet of Things, and Java such as soft computing and Cloud Computing makes me an excellent fit for your team. I am always learning to grow, and face the puzzles head on, usually with creative solutions. Thank you for your time and consideration and I would be delighted to discuss how I can further the objectives of your team and your institution.

Yours Sincerely,

Ardeepan S
